INFORMED CONSENT FOR TREATMENT

The Nature of Chiropractic Examination and Treatment: The doctor will perform a physical examination. X-rays may be taken to evaluate your condition. The doctor will use his hands or mechanical device in order to move your joints. You may feel a “click” or “pop” similar to the noise produced when a knuckle is “cracked”, and you may feel movement of the joint. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic ultrasound, cold laser therapy or traction may also be used. Exercises may be recommended.

Benefits of chiropractic treatment: Many or most patients will feel improvement in motion, decreased muscle and joint pain and improved well-being after a series of chiropractic adjustments.

Possible risks: As with any health care procedure, complications are possible following chiropractic treatment. Complications could conceivably include fracture of bone, muscular strain, ligamentous sprain, dislocations of joints, or injury to intervertebral discs, nerves or spinal cord. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritations, burns, or other minor complications. X-rays produce ionizing radiation. There are reported cases of stroke associated with visits to medical doctors and chiropractors. The best quality scientific evidence does not establish a cause-and-effect relationship between chiropractic treatment and the occurrence of stroke; rather, it indicates that patients may be consulting medical doctors and/or chiropractors for symptoms of headache and neck pain when they are in the early stages of a stroke. The possibility of such injuries occurring in association with chiropractic treatment is extremely remote.

Probability of Risks Occurring: The risks of complications due to chiropractic treatment have been described as “rare” to “extremely rare”.

Risks of Remaining Untreated: Delay of treatments allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility and induce chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult.

_____ (initial) **Unusual Risks:** I have had the following unusual risks of my case explained to me:

I have read the above explanation of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo the recommended treatment and hereby give my full consent to treatment.

I hereby request and consent to the performance of medical services, examinations, chiropractic adjustments and other procedures (including various modes of physical therapy and diagnostic x-ray), or physical therapy on me (or the patient named below, for whom I am legally responsible) by Shayne Bauer, D.C. and/or other licensed clinic doctors who now or in the future treat me while employed by, are working or associated with, or serving as a back-up doctor, including those working at the clinic. I have had an opportunity to discuss with the doctor and/or with other office or clinic personnel the nature and purpose of medical services and examinations, chiropractic adjustments, and other procedures. I understand the above information and guarantee this form was completed correctly to the best of my knowledge; and I also understand my responsibility to inform this office of any changes in medical status. This informed consent will remain in effect unless there are significant changes to my diagnosis. I have the right to withdraw my consent at any time, upon written notice. I have the right to refuse treatment at any time.
